```

DIMERS OR STELLATE STRUCTURES.
SUBCELLULAR LOCATION: EXTRACELLULAR

TISSUE SPECIFICITY: FOUND IN THE HASEMENT IN PERC. CONTAINS THREE HEPARAN SULFATE CHAINS AND G-LINKED OLIGOSACCHARIDES. MEMBRANIS AS WELL AS N-LINKIN

-!- SIMILARITY: CONTAINS 4 LDC-REALD FOR COMMAINS.
-!- SIMILARITY CONTAINS 10.5 LAMININ FROF-LIKE HOMAINS.
-!- SIMILARITY CONTAINS 15 LAMININ LOMALINS [V.
-!- SIMILARITY: CONTAINS 15 LAMININ C-LIKE C2-TYPE HOMAINS.
-!- SIMILARITY: CONTAINS 2 EACH-LIKE HOMAINS.
-!- SIMILARITY: CONTAINS 2 EACH-LIKE HOMAINS.
-!- SIMILARITY: CONTAINS 1 SEA HOMAIN.

SUBBUNT: HOMODIMER: DISULPIDE:LINKED.

SUBBULANTA LOCATION: TYPE I MEMBRANE PROTEIN.

TISSUE SPECIFICITY: EXPRESSED ON NORMAL T CELL LINES AND CLONES,
AND SOME TRANSPORMED T CELLS, BUT NO OTHER CHITURED CELL LINES
TESTED. IT IS EXPRESSED AT VERY LOW LEVELS ON ACTIVATED B CELLS.

DEVELOPMENTAL STACE: EXPRESSED AT VERY LOW LEVELS ON PEAKING 6 TO 9 DAYS

AND IS STRONGLY DI-REGULATED AFTER ACTIVATION, PEAKING 6 TO 9 DAYS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          FUNCTION AT A TIME AFTER T AND NK CELLS HAVE PENETRATED THE ENDOTHELIUM USING INTEGRINS AND SELECTINS, WHEN THEY ARE AC

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Alathors: Hunter, J.L.; Jenkins, J.; Johnson-Hopson, C.; Khan, S.; Khaykin, E.; Kim C.A.; Li, J.H.; Li, Y.; Lin, X.; Liu, S.X.; Liu,
